

MedHand leads a paradigm shift in the supply of on-demand medical reference information for doctors, nurses, pharmacists and clinicians.

• **SAVE MONEY**

Millions of pounds per year are spent on local documents, which can be difficult to access, having them in your iPhone running alongside your BNF etc, means you can access them and cross reference them any time you need.

• **IMPROVE EFFICIENCY**

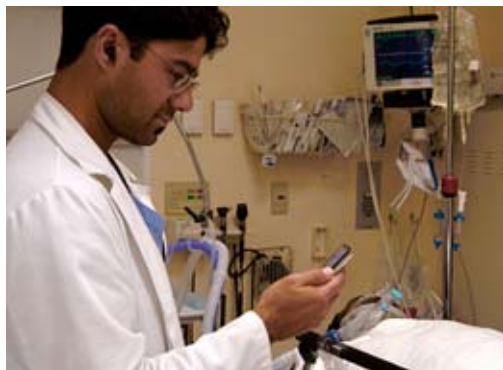

Tracking and monitoring usage of accessed information is invaluable. You can learn where, when, how and what information students are using during training.

• **SAVE TIME**

Having DrC available at POC saves valuable time, for example researching and cross referencing a condition in 15 books that would take hours now takes seconds.

• **TRUSTED REFERENCES**

We are Digital partners with 95% of

the world's major medical publishing groups, including The Royal Pharmaceutical Society, Oxford University Press, Thompsons and Wiley and Wolters Kluwer's. A selection of titles could include: BNF and BNF Children, all the Oxford Handbooks, Harrison's Manual of Medicine, Netter's Atlas of Human Anatomy, Physicians' Desk Reference, Stockley's Drug Interactions and Clinical Evidence.

Medhand Mobile Libraries are ready to use. The library is stored on a memory card and shipped in a DVD box with a comprehensive manual. With supplied adapters you can use the library on smartphones with MicroSD, MiniSD and SD card slot, it can be viewed on any Windows PC or Mac OSX with a USB port, a PDA with Windows Mobile or Palm OS5 with touchscreen and memory card slot.

EXISTING E-PORTFOLIOS.**

**IMPROVES EFFICIENCY AND  
PATIENT SECURITY SAVING  
VALUABLE TIME AND  
ADMINISTRATIVE COSTS.**

"In our recent study we asked foundation doctors which clinical resource they preferred. The Dr Companion was their preferred resource."

Claire Honeybourne, Library Manager  
University Hospital of Leicester

- The mobile library with the most trusted medical reference titles. Medhand is also exclusive world wide provider of all the Oxford handbook series.
- Local/regional information is integrated with national references to make sure that your doctors can access these side by side with national and international books like the BNF at any time.
- Patent pending user friendly browser with unique fast search across the full library which can also be accessed on doctors laptops.
- All information is continuously updated online.
- Usage tracking logs can be retrieved and sent back to you for further analysis providing non biased feed back on how doctors are using, for example, their BNF.
- We work closely with our clients, being present at roll outs with tutorials and dedicated support.
- We have long term experience with mobile installations within the NHS with roll out on Smartphones; iPhone, Blackberry, Win Mobile as well as iPods and PDA's.
